

Attain Financial and Business Goals

They say time is money. Are you aware of how you spend your time or money?

Awareness is key. Unless and until you become aware of where your resources are going, you won't be able to impact them.

Money means different things to different people. Some want Security. Others want to buy the latest fashion. Some want to look their best. Others want to have a nest egg. Many may want to have a nice home or car.

"Success is the progressive realization of a worthy Ideal."
-Earl Nightingale

It is important to know yourself and your values, if you are going to achieve them.

Is a lot of your time spent in activities that you feel might be wasteful? How much time do you spend online?

Are you satisfied with your time off? Do you watch a lot of TV?

Maybe these hours could be going toward one of your important projects...

"The odds of hitting your target go up dramatically when you aim at it."
-Mal Pancoast

Does your business have a secure revenue base? A pipeline stream of potential customers? Are you making the cold calls you need to make each day?

Business development depends on commitment, planning, steps to take and action.

Are you accountable to get the job done? Are you doing what you need to do to make the business successful? Are you buying into the "recession" talk or are you going to create what you want out of your business? Do you have a plan you are following?

Weekly Assignments can make the plan into a reality.

Business Goals and Objectives

Make business goals

Write down objectives

Make a timeline

Take Actions

Follow up

Have someone to be accountable to

Reap the rewards of your labor

Acknowledge self for accomplishments
